

Stars Will Always Be Nearer Than You

(Helmut Huber - 2004)

You don't like to dance at all
And so we're sitting here side by side
But how should I get you in my arms
To hold you tight

You don't talk very much
But I think you've got enough to say
Your smooth voice enchants me
I could hear it every day

Your bright eyes are sparkling more
Than the most precious diamond can do
Wanna feel you so near, but I'm afraid, for me
All the stars will always be nearer than you

There is a deep green lake
And deep below are all my dreams
Hidden in darkness, like a treasure
That no one wanna find, like it seems

You are a fascinating woman
In a wonderful secret dream
My mysterious girl, who can imagine
How happy I've been

Your bright eyes are sparkling more
Than the most precious diamond can do
Wanna feel you so near, but I'm afraid, for me
All the stars will always be nearer than you

(Repeat chorus)

I've got the fear
You don't feel like I do
So this sweet dream is hidden
In endless darkness too
